Our system transformation plan

Transformation priorities

- Prevention & self care
- Primary care
- Integrated Care in the Community
- Urgent & Emergency Care
- Specialised services
- Five Year Forward View Priorities

New business model

- Strategic commissioning
- Accountable Care Partnership

Key attributes

- An enhanced focus on local population health to improve outcomes and manage demand on the rest of the system.
- An integrated, place based approach to care in the community will be at the heart of our system.
- Enhanced, consistent services responding effectively to acute episodes, preventing issues escalating and enabling quicker recovery.

- Shared leadership, accountability & decision making
- Joint responsibility for performance, quality and financial outturn
- Reduced organisational fragmentation
- Shared vision, culture and values driving joined-up delivery of services
- Focus on the best use of finite resources available, independent of organisational and professional boundaries

Outcomes

- Improved Health & Wellbeing
- Improved people’s experience of care and support
- Reduced cost
- Prosperity and inclusive growth

Devolution as a strategic enabler

- Innovation test bed for rural areas
- Local control and influence
- Accelerate delivery & enable a more integrated system
- Driving our prevention agenda and addressing inequalities in health
